Subject: Comments on Tentative Waste Discharge Requirements General Order for Existing Milk Cow Dairies

Polly

Good morning. I know this is late - I thought I had sent formal comments, but found the draft and realized I never finalized it. Therefore I will limit comment to this.

Since these regulations will put a financial burden on the dairymen, we should develop a support system to ease the impact just like we did for the UST owners. The USTCFP has worked effectively for 15 years, so we have a well established model to adopt. Can the RWQCB take that as a priority as you work on finalizing these regulations?

Thanks!

Ray
